Trepson Montessori Preschool/ Home School Supplement Program

Director: Trevina Jefferson, M.Ed

Preschool for FALL 2018

The Montessori researched method is used for children 2-6 years of age. This means the environment is set-up to attract each child's internal motivation to learn and that each child progresses on his/her own plan. Our program is also aligned with the Iowa Early Childhood Standards.

In addition, the program has the following attributes:

Individualized

Children are continuously engaged in activities that meet their specific needs and set the foundation for development to the next stage

Child Development

There is balance in social/emotional (including self-empowerment/confidence, relationship building, societal mannerisms, and problem solving), communication/language, cognitive (targeted in concentration, research, and follow through), gross and fine motor (physical), and health safety development

Academic Focus

A deliberate focus on reading, writing, mathematics, science, and engineering from concrete to abstract development via a foundation in sensorial and practical work application

Continuous Assessment & Research

Children are continuously observed and assessed to inform the approaches taken with children and their individual learning plan. We participate in nationwide and international research projects in child development and education.

Parent & Me Bridge

Parents/Guardians are supported with learning about how to meet their child's needs with the Montessori approach in the classroom and provide consistency at home while maintaining family values

Program Schedule, Hours, & Investment Fees

Preschool/Home School Supplement Program Hours A (Ages 2-6):

12:30 – 5 pm Monday – Thursday
